

air conditioner guidelines

Guide to customer

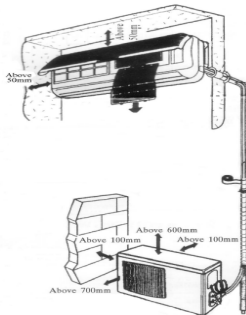

- The customer should provide a suitable power supply source, its voltage should be in the range of 90-110% of its rated voltage.
- The power supply circuit should have MCB leakage protection. The capacity should be more than 1.5 times of the maximum current.
- Must use independent circuit and suitable grounding socket matching with the plug of air-conditioner.
- The wiring must be installed by qualified electrician according to the electrical safety requirements.
- The air-conditioner must be well grounded, the switch of the main power of air-conditioner must be reliably grounded.
- The power supply wire, must be changed by qualified electrician.

Installation Instructions

Selection of the installation position

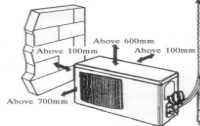

Indoor Unit

- There is no heating and steaming source nearby.
- No obstacles for installation position from nearby.
- Keep good air circulation.
- Convenient to adopt measures to reduce noises.
- Don't install them near the doorway.
- Make sure to have the distance specified in the picture between the ceiling, wall, furniture and other obstacles.
- 2 meters high above the floor.

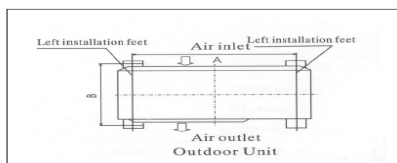

Outdoor Unit

- In case that you put up a canopy to protect it from rains and sunrays, pay attention not to cause any obstacles for the heating dispersion for the condenser.
- Don't keep animals or plants near the installation location for the hot air from the outdoor unit will affect them.
- Make sure to have the distance specified in the picture between ceiling, wall, furniture and other obstacles.
- Stay away from heating source and inflammable air.
- The installation base and supporting frame should be strong and secure. The machine should be at a level surface.

Installation of the Outdoor Unit

- The outdoor unit must be firmly fixed to avoid falling in strong wind.
- Install on the cement base as in the drawing.
- If it is installed at seaside or at a place high above the ground and with strong wind, the AC should be installed against the wall to ensure the normal operation of the fan and the blocking plate should be used.
